FUEL PRICE RISK MANAGEMENT POLICY REPORT

March 2023

The Fuel Price Risk Management Policy approved by the Board on February 16, 2006 requires monthly reports to the Finance/Audit Committee. Per the Finance Chair in 2009, the report is to be presented quarterly to the F/A committee. The Board has approved resolutions authorizing implementation of the Fuel Hedge Policy for FY2008 (October 2006). In July 2008 the Board amended the Fuel Risk Management Policy by eliminating the July 15 deadline for hedging the next fiscal years fuel requirement.

Per the METRO Fuel Price Risk Management Policy, "METRO will minimize operating budget variance attributable to fuel price variability through physical forward contracts and/or financial contracts. METRO will develop and implement a plan which will provide fuel and energy commodity price certainty for up to 24 months of expected consumption such that the operating budget expense is assured with some potential to realize savings if prices decline."

All hedges will be constructed to qualify for hedge accounting treatment under Financial Accounting Standards Board (FASB) guidelines. This means that any financial hedge instrument must settle against, or directly link to, the index used as the pricing reference in the applicable procurement contract. For example, if METRO has a contract for delivery of fuel based on Platt's Gulf Coast Low-Sulfur Diesel Index, the financial hedge must reconcile to Platt's Gulf Coast Low-Sulfur Diesel Index.

A. Diesel Fuel Hedges

Also per METRO's Fuel Price Risk Management Policy, the Authority's Diesel Fuel Hedge Strategy Team, referred to here as "Team", makes hedging decisions on METRO's behalf. The Team is lead from the Procurement department's perspective, and is comprised of Operations, Finance, Procurement, and Executive Office staff. The Team's objective is to strategically enter into agreements that cover 80% - 90% of projected fuel requirements. Actions and correspondence are typically conducted and documented via email, and the Team convenes as needed. Upon agreement by vote, the Office of Management and Budget, and Procurement department collaboratively initiate and execute Financial Hedge Swap Agreements.

METRO currently has trade partnerships with Bank of America Merrill Lynch, and J. Aron & Company LLC, Goldman Sachs.

Five buys completed FY2020 hedging for a total of 10.542M gallons at the average price of \$1.8679 per gallon. Eight buys completed FY 2021 hedges totaling 10.836M gallons averaging \$1.7344 per gallon. Eight buys completed FY 2022 hedges totaling 9.072M gallons averaging \$1.4486 per gallon. (Hedged at market rate only, excluding transportation, additive and taxes).

FY 2023 estimated usage was updated on June 17, 2022, and a hedge was executed on June 30, for 7.014M gallons, at an average price of \$3.2376 per gallon. This results in an 83% hedged position for October 2022 through September 2023. See Attachment A1 for details.

Fiscal settlements through March total (\$1,038,912). A summary of FY2023 hedged gallons, actual usage and settlements are outlined in Attachment B1.

B. 5 Year Contract for Electricity

The Board authorized contract for electricity provider services concluded in June 2020. The replacement contract does not hedge electricity requirements. As a result, the quarterly Fuel Hedge Risk Management Report no longer reports electricity contract activity.
