HOT Lane Average Speed

• The average peak speed for all HOT Lanes met both the monthly and year-to-date goals.

MONTHLY PERFORMANCE REPORT March 2023 **Performance Statistics**

MONTHLY PERFORMANCE REPORT March 2023 Performance Statistic Definitions

Bus and Rail Accidents - An accident is a transit incident with passenger injuries that requires immediate medical treatment away from the scene or a collision between a revenue vehicle and an object such that the amount of damage exceeds \$1,000. Bus accidents (which include METROLift) and rail accidents are reported separately and in terms of the absolute number of accidents and the relative number of accidents per 100,000 vehicle miles. A rail accident is defined as any physical contact between a rail vehicle and another vehicle (including another rail vehicle, car, truck, or motorcycle), a pedestrian, or bicyclist along the main rail line.

Group A Criminal Incidents Offenses - The Group A Offenses are based on the National Incident-Based Report System (NIBRS). Group A offenses consist of twenty-four (24) offense categories which address fifty-two (52) specific crimes. Group A offenses are more serious in nature and tend to be against persons or property and included: animal cruelty, arson, assault offenses, bribery, burglary/breaking & entering, counterfeiting/forgery, destruction/damage/vandalism of property, drug/narcotic offenses, embezzlement, extortion/blackmail, fraud offenses, gambling offenses, homicide offenses, human trafficking, kidnapping/ abduction, larceny/theft offenses, motor vehicle theft, pornography /obscene material, prostitution offenses, robbery, run aways/persons under 18, sex offenses, stolen property offenses and weapon law violations. This metric is reported both in terms of the absolute number of incidents and the number of incidents per 100,000 boarding's.

<u>Criminal</u> Incidents - METRO Properties - The total Criminal Incidents - METRO Properties is the number of incidents that occur on METRO property: Park & Ride, Transit Centers, On-board Buses and On-board Light Rail Vehicles (LRVs) and on LRV Platforms. This metric is reported in terms of the absolute number of incidents.

Complaint Contacts - Patrons may contact METRO's Customer Care Center to express dissatisfaction with METRO Operations. Contacts made via telephone and over the internet which result in a complaint record being generated in the Public Comment System are reported as the number of contacts per 100,000 boarding's.

<u>Commendations</u> - Patrons may contact METRO's Customer Care Center to recognize, compliment or praise a METRO employee or the METRO organization for exemplary work or performance. Contacts made via telephone, internet, email or mail which result in a commendation record being generated in the Public Comment System are reported as the absolute number of contacts received.

Average Call Center Answer Delay - METRO is committed to providing customers with accurate, customer-friendly bus and service information in a timely manner. Customers may obtain bus information over METRO's website and by telephone using an interactive voice response system without speaking to a representative and with no customer wait time. For those customers who prefer to speak with a representative, METRO's goal is to answer their calls in 105 seconds or less.

On-Time Performance (OTP) - A local bus is on-time if it does not leave early and is within a five (5) minute window after the scheduled departure time; October-January data. *Modification to OTP parameters in February which allows fifty-nine (59) seconds before a scheduled departure - instead of zero, based on Board Member concurrence during the January Committee meeting. A Park & Ride bus is considered on-time if it does not depart early (except in the morning when a bus can leave from a Park & Ride lot when full) and is within a five (5)minute window after the scheduled departure time, with measurements during peak hours. OTP is measured by the Integrated Vehicle Operation Management System (IVOMS) which calculates data to the second, and the five (5) minute window is defined as anything less than six (6) minutes. For METRORail, a train departing from the beginning of the line or arriving at the end of the line less than five (5) minutes after the scheduled time is considered on-time. For METROLift, a trip is considered on-time if the vehicle arrives within 30 minutes of the scheduled pick-up time and no later than the appointment time.

Mean Distance Between Mechanical Failures (MDBF) - MDBF reflects any mechanical issue encountered during operation of the vehicle in revenue service that requires a maintenance action resulting from a mechanical failure. Mechanical failures include warranty and fleet defects but exclude accidents.

Mean Distance Between Service Interruptions (MDBSI) - Measures total revenue service miles traveled by Light Rail Vehicles (LRVs) between service interruptions that delay LRVs for one minute or more due to mechanical failures.

Average Peak HOT Lane Speed - HOT Lane speed is based on an average of measurements conducted during the AM and PM high-volume commuter periods. METRO's 45 mph benchmark is based on Federal statute 23 USC 166: HOV facilities, which sets 45 mph as a minimal acceptable rate of speed.
